- Detailed rights management enabling to specify tailor-made user profiles
- Flexible architecture: hosted (ASP) or internalised upon Clients preference
- Complete and simplified procurement management, from tender initiation to contract award
- Web services interface
- RSS publishing
- Electronic archiving of tenders

INTRODUCTION

Fully compliant with European Directive on public procurement, LOCAL TRUST MPE is complete business solution for public e-procurement.

The solution manages every type of procedure and covers e-noticing of contracts, e-tendering including downloading of tender documents and bids submittal, e-auctions and e-awarding.

- **LOCAL TRUST MPE is applicable to public entities of any size (Ministries, local governments, city councils, public agencies)**
- **The solution can be deployed for a local territory, fulfilling the needs of all the public authorities and sharing a common supplier portal**
- **ATEXO has a wide experience of deployment that confirms the full coverage of any procurement strategy: types of contracts, of tender procedures, centralised or decentralised management within the public entity, etc.**

DESCRIPTION OF THE SOLUTION

LOCAL TRUST MPE was developed in a triple objective of :

- Complying with European Directive on dematerialised public procurement and its transcription in national laws
- Fulfilling the needs of large public entities as well as smaller local authorities
- Providing both technical and functional ease of use to suppliers, in order to achieve effective usage and dematerialisation

Référence	Statut	Objet	Registres	Date limite de remise des plis	Actions
MML_04_06_08	08	Objet : Fournitures de bureaux : papeterie, tuner, etc ...	0 ± 0	24/09/2008 17:30

The solution provides complete dematerialisation of the procurement process.

With more than 5 years of experience of public e-procurement, the solution guarantees applicability for any type of contracts and any type of procedures, including specific tenders for the Defense sector, design contracts or dynamic purchasing system.

LOCAL TRUST MPE is specifically designed to be set-up as a local portal for all authorities and agencies of a territory. This e-procurement portal provides maximum benefit both

- to suppliers (unique access point to all local buyers, specific strategy towards SME's, etc.)
- to public buyers (better access to suppliers, group orders, mutualised investment and running costs, etc.)

The solution comes along with a reporting module which provides public buyers with statistics on procurement activities.

Associated services:

ATEXO proposes the following services to ensure Client's successful project:

- Solution set-up
- Configuration and deployment
- System integration to Clients IT environment
- Software hosting and service run
- Trainings and change management
- Maintenance and support

FONCTIONNALITÉS

The LOCAL TRUST MPE solution provides with the business functionalities for e-procurement and with relevant administration functionalities :

➤ e-Noticing

- Selection of tender characteristics: type of notice, type of procedure, object, lots, etc.
- Selection of users authorised to the tender
- Publishing to the JOUE, national legal press and national or local press

➤ e-Tendering

- Centralised management of paper or electronic bids
- List of suppliers registered to tender, for further notification in case of tender modification
- Secure bids submittal complying with digital signature and time-stamping regulatory obligations
- Strong authentication of authorized users for bids opening, compliance to 4-eye principle
- Suppliers pre-selection, if applicable
- Minutes of bids opening session

➤ e-Auctions

- Electronic invitation to auction, to suppliers having submitted electronically or in paper
- Multiple auctioning parameters, and global ranking formula
- Reserve price, upon buyer's decision

➤ e-Awarding

- Electronic notification of awarded suppliers
- E-noticing for contract award notice
- Automatic generation of European statistical report on public procurement
- XML archiving

ARCHITECTURE TECHNIQUE

The software solution LOCAL TRUST MPE follows a full web architecture. It is an open-source software, subject to the GNU General Public License.

The software was developed in PHP5, with the frameworks Propel (persistence) and Prado (MVC2).

The reporting module is a java EE solution.

ATEXO has multiple experiences of integrating LOCAL TRUST MPE to SSO solutions or to Client LDAP directories.
